

Reporting Bugs And Enhancements

Please observe the following guidelines when creating a new report:

- Take a moment to decide the right place to publish your comments. See [Getting Help](#).
- Read [How to use this forum!!](#) which applies to the Google Group, Code Project, and GitHub.
- Always include the ToDoList version (7.0.1, 7.0.2...) and your operating system and version (Windows XP, 7.0, 8.1, ...).
- Be specific about how to recreate a problem. It is difficult to fix issues if they cannot be reproduced.
- Add a screenshot to your issue reports if it applies - a picture says a thousand words. Use whatever mechanism you prefer to get a screenshot. In the Google Group you can add a screenshot in your posting. For Code Project, save the image to your preferred image website (Dropbox, PhotoBucket, etc) - use a free site that does not require a login to access images. Get a direct link to your screenshot. When using GitHub resources, see [this page](#) to see the Markdown code to add an image into your Issue report. Or you can simply paste in the URL for anyone to click to get the image.
