

# Simple Text Task Comments

## Images and other files in Simple Text

To insert an image (or other file) into the Simple Text comment area you have a number of choices:

- 'Copy and Paste' the file(s) from Windows Explorer (Ctrl+C, Ctrl+V).
- 'Drag and Drop' the file(s) from Windows Explorer.
- Right-click and select 'Insert File Link' from the popup menu.

Note: For security reasons it is not possible to embed executable files.

In all cases, this will result in a URL link to the chosen file(s), unlike the [Rich Text Comments](#) which allows files and images to be embedded alongside the text content.

Clicking the URL will open the file/image from its original file location.

## Features Common to both Simple and Rich Text Comments
